Climate Justice Newletter Published At COP in Bali

Wednesday, 05 December 2007

Alter-Eco is published by a group of NGOs, Indigenous Peoples Organisations and social movements at the UN Framework Convention on Climate Change COP-13 who came together to make a unified call in support of real solutions to climate change and against the false market-based solutions to climate change that are being implemented under the Kyoto Protocol.

We join together to produce Alter-Eco as an instrument through which to project our collective voice, which reflects the views and concerns of grassroots constituencies and impacted communities all over the world.

Alter-Eco will be published throughout the COP.
